“Dr. Macyszyn’s lifelong passion for improving patient health and quality of life results in a distinctly personalized approach to care.”

Board-certified and fellowship-trained, Dr. Luke Macyszyn is an experienced neurosurgeon who’s mastered cutting-edge techniques to provide specialized care for complex spinal disorders. With a personalized approach to patient care, Dr. Macyszyn is setting the new gold standard in spine care.

“Spine surgery has become a very technologically-driven field, which is extremely exciting,” says Dr. Macyszyn, whose expertise in minimally invasive treatments, including those for degenerative disease, disc herniation, scoliosis, and spine tumors, ensures patients of all ages a comfortable and safe treatment journey. “I have spent over a decade perfecting minimally invasive surgery so that patients have access to these procedures in an outpatient setting, reducing their pain and significantly shortening their recovery.”

At heart, Dr. Macyszyn describes himself as “a scientist who goes to great lengths to figure out the reason for a patient’s symptoms or pathology.” He is not, he says, “a one size fits all physician/surgeon” with a favorite procedure or implant. “My job, and what I think has allowed me to be successful, is in my ability to think outside of the box, to diagnose the patient’s pain and develop the best approach for them.”

Now, together with DISC Sports & Spine Center, Dr. Macyszyn is redefining quality spine care and the patient’s experience. “We have significantly expanded our footprint and now offer services to patients throughout Southern California and beyond.” Additionally, “Our recently opened flagship surgical center in Marina del Rey will give patients unparalleled access to advanced restorative and motion-preserving surgery in an advanced, luxury facility.”
